

Buratai Initiative (RIC) in Borno State

BI/RIC LGA level capacity building report

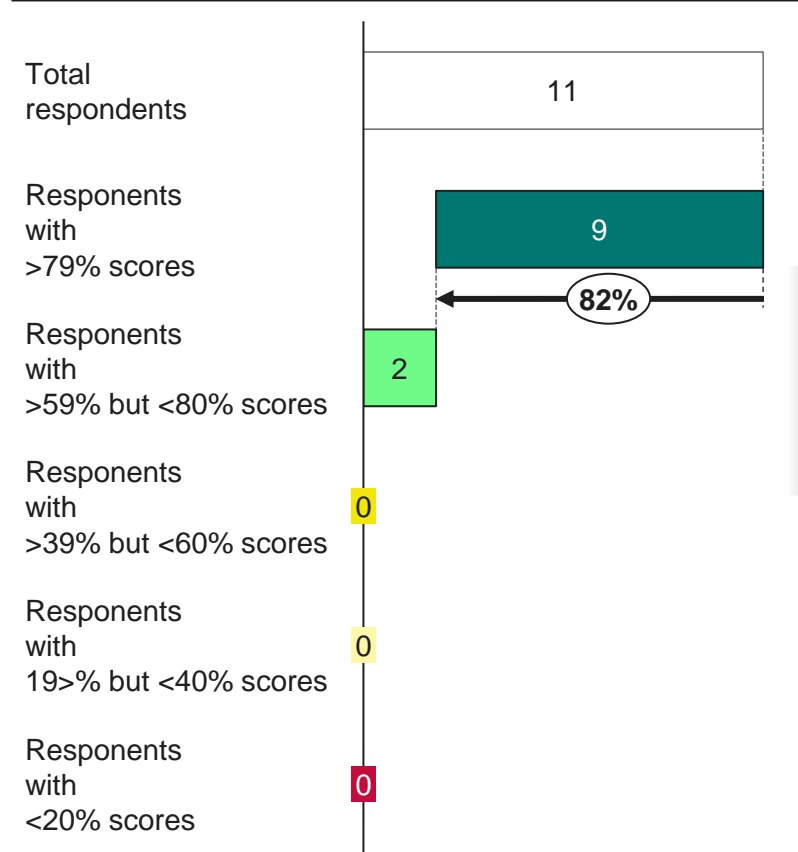

September, 2020

Background

- BI/RIC initiative was designed to provide polio health services to the under-5 population in inaccessible locations across Borno state and BI/RIC teams have reached **70% (4,947) of the 7,078** inaccessible settlements targeted for vaccination with bOPV and vaccinated **123,561** unique children across Borno state
- Following Nigeria and indeed Africa's polio free certification, GPEI partners are set to ramp down support to polio programs in the state therefore, the management and funding of the BI/RIC strategy must be transitioned to Borno state Primary Health Care Development Agency program officers
- In light of this, the team drew up a transition plan that detailed the capacity building required to effectively transition management of the BI/RIC strategy
- This document lays out the progress of the capacity building efforts of the team at both state and LGA levels

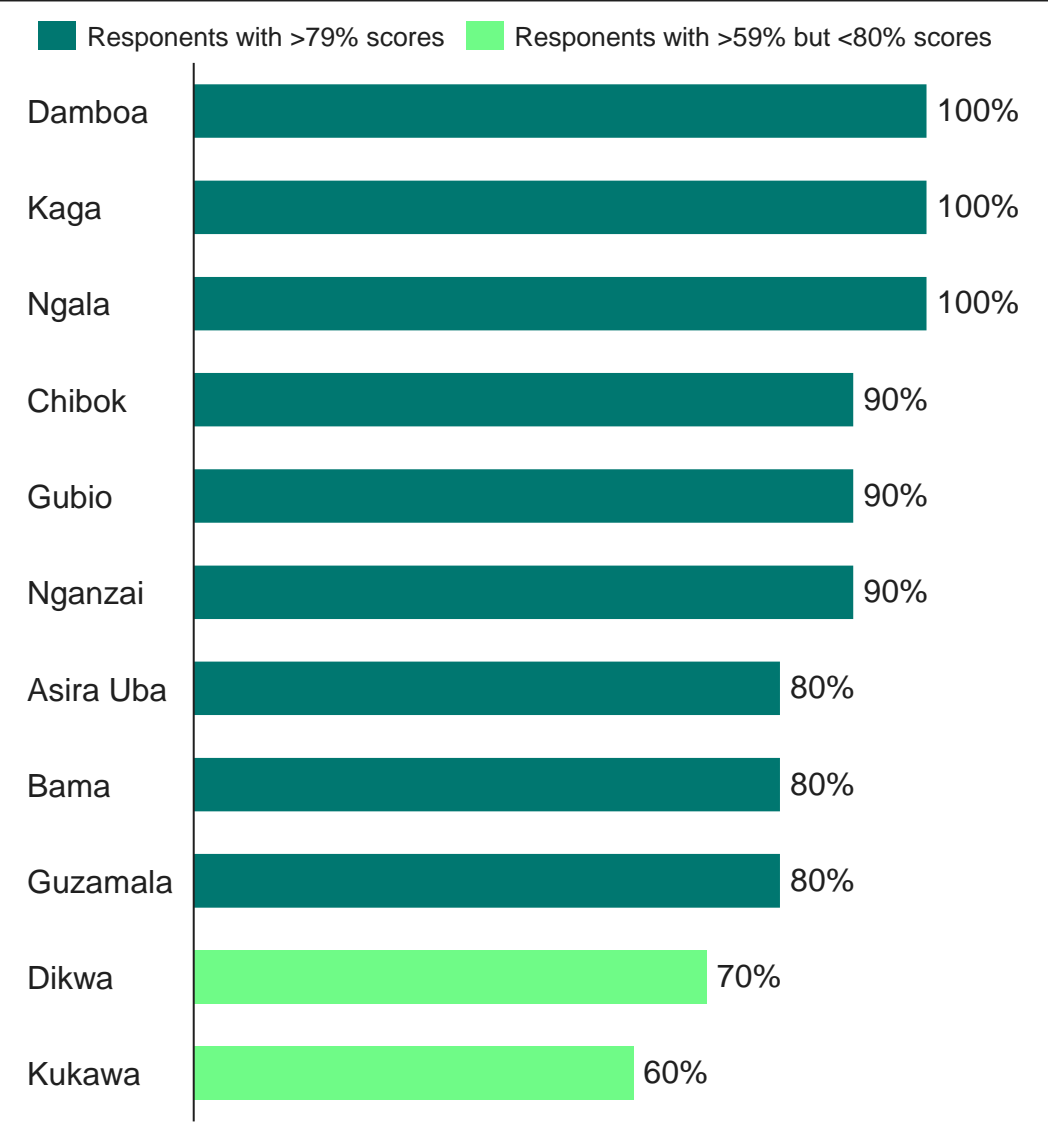

9 (82%) of the 11 LIOs that took the baseline assessment test were found to be competent at micro planning

Chart showing overall baseline competencies of LIOs in micro planning (numbers)

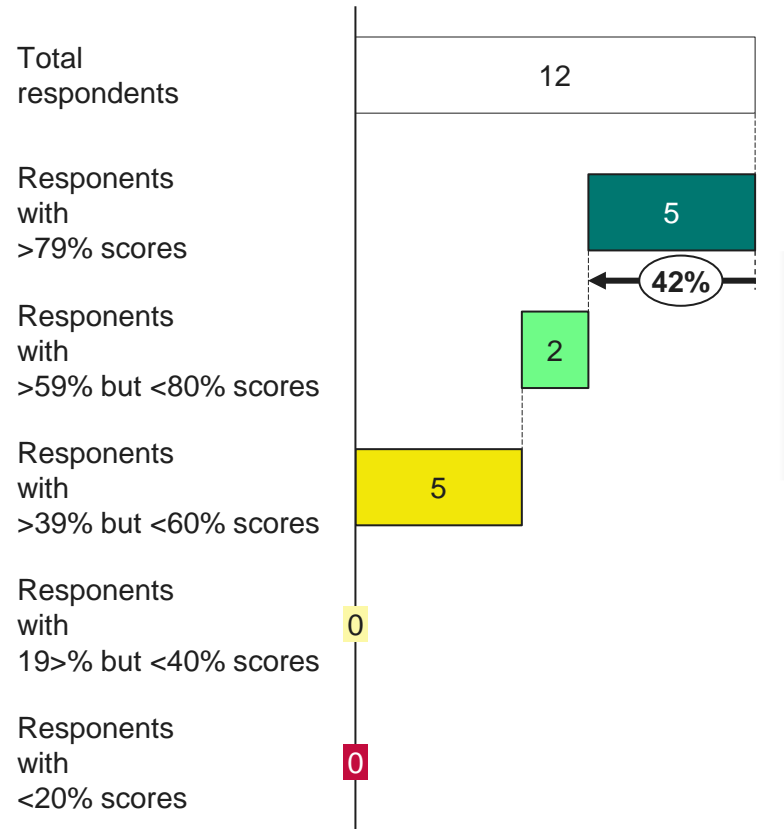

- LIOs from 10 LGAs (*Abadam, Biu, Gwoza, Kala Balge, Konduga, Mafa, Magumeri, Marte, Mobbar, and Monguno*) are yet to take the baseline assessment test for micro planning
 - The team will administer baseline assessment tests to all relevant program officers in the week of September 14, 2020

Charts showing breakdown of baseline competencies of LIOs in micro planning by LGA (number)

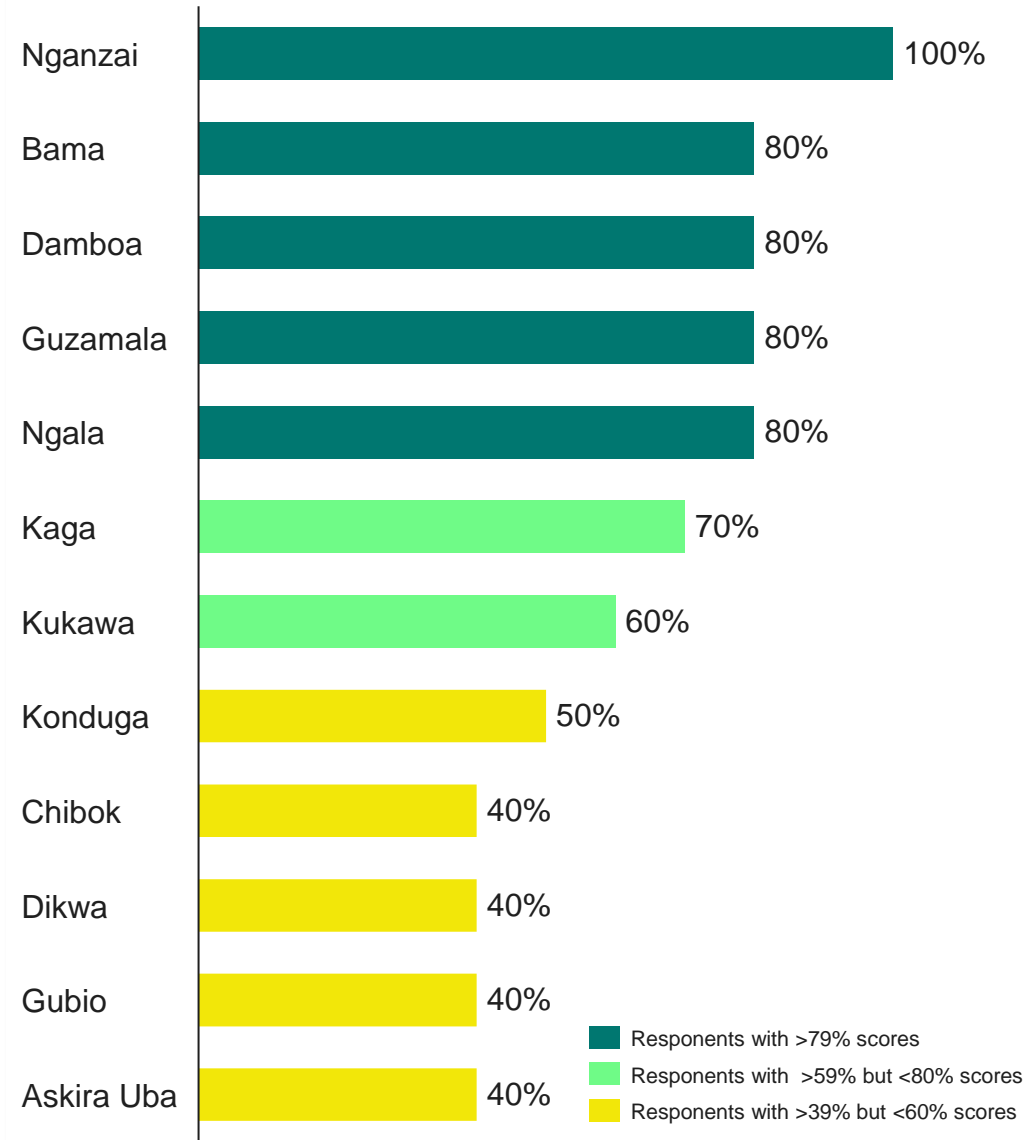

5 (42%) of the 12 LIOs that took the baseline assessment test were found to be competent at feedback and advocacy

Chart showing overall baseline competencies of LIOs in advocacy and feedback (numbers)

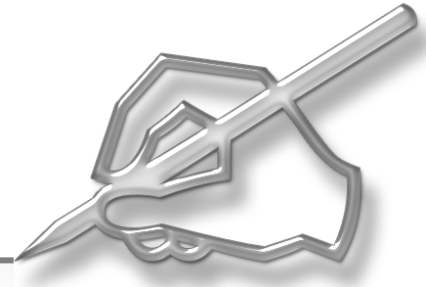

- The team will target identified gaps in the capacity of program officers for strengthening
- LIOs from 9 LGAs (*Abadam, Biu, Gubio, Gwoza, Kaga, Kala Balge, Mafa, Magumeri, Marte, Mobbar, and Monguno*)
 - The team will administer baseline assessment tests to all relevant program officers in the week of September 14, 2020

Next steps

- 1 Commence capacity building of BoSPHCDA program officers at LGA level
- 2 Design a flexible schedule for coaching sessions in order to utilize the time program officers spend in the state capital
